

## FULL-STACK DEVELOPER

### A Trailblazer

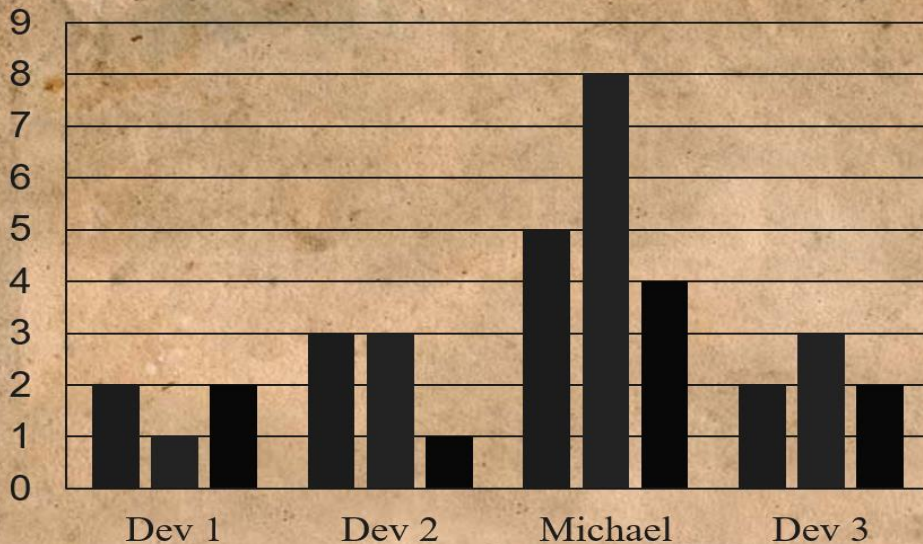

With a strong passion for coding and real-world experience, Michael Rizig would be an amazing addition to any company looking to increase throughput. Michael has extensive experience in Object Oriented languages Java, C++, C#, and many others. He also frequently creates projects in Javascript utilizing node js, react, three.js, and many other libraries. Finally, Michael has had real world experience with the likes of Python, SQL, MongoDB, and others.

### From a hobby to a career

Michael was born and raised in and around Atlanta Georgia and picked up coding in middle school as a hobby. He got his start creating 2d games in Java and later python, and entering 48-hour game dev competitions in high school such as Ludum Dare and The Global Game Jam. He has also competed in many University Sponsored Hackathons and coding lock-ins to perfect his craft and gain experience working in teams and with time constraints.

## BLOWS AWAY COMPETITION

### THE CHOICE IS CLEAR

Michael blows away the competition in many ways, but primarily his ability to coordinate and work in teams, his propensity for problem solving, and his outstanding creativity. He's a perfectionist at heart and prioritizes efficiency in his work.

### Highly Flexible Worker.

Michael is willing to adjust his schedule around meetings and is willing to work either remote or in-person.

He is also amenable to changes and is able to move from one project to another in succession without any drops in efficiency.

### A Star Student.

Michael has an amazing school record, easily achieving well over a 4.0 GPA in High School, and an average 3.8 in University.

With perfect attendance, Michael is a reliable choice for employment. You can rest easy knowing you've chosen a reliable employee who will always get their work done in time. With a desire for learning, he will always be improving his skillsets for the job, on and off the clock.
